

Black Petrified Wood Slab

Petrified wood has several colors, black is one of them, is a relatively special petrified wood material.

The black [petrified wood slab](#) is made of natural black Petrified wood slices, and the surface adopts high strength polishing technology, which is smooth and delicate. Since each piece of raw material is natural, the entire gemstone slab is unique. The unique texture has been favored by many designers, and it is a unique artwork.

Our advantage

We have the flexibility to handle semi-precious stones slab. Increase the use of semi precious stones by laminated other materials, For example, glass, aluminum honeycomb, granite, artificial stone, ceramic tile and other materials.

We can also process semi precious stones slab into water jet medallion, art walls, furniture, countertops, sinks and other products.
