

Shengyao gemstone is a natural mineral crystal with a complex internal structure. It is composed of many small, irregularly shaped crystals that are tightly packed together. This structure gives it a unique, textured appearance and a high refractive index. Shengyao gemstone is often used in jewelry and as a decorative material. It is also known for its ability to absorb and store energy, making it a popular choice for metaphysical practitioners. The color of Shengyao gemstone can range from clear to various shades of yellow, orange, and red, depending on the specific mineral composition and the conditions under which it was formed.
