

Backlit Labradorite Slab, Semiprecious stone slabs, Gemstone slab

Labradorite is a mineral feldspar, Labradorite is common, had been used as a decorative material, some of them have iridescence treated as a gem.

Gemstone slabs made of Labradorite stone are very special and appear different colors when viewed from different angles. When Labradorite laminated glass as base has a different visual effect. The light transmittance of glass can show the grain of Labradorite stone better. backlit [Labradorite slab](#) widely used in the background wall, floor, bar countertop.
