

Backlit blue [agate flooring tile](#) is a high-end semi-precious stone decorative material that combines natural beauty with modern technology. The raw material of blue agate flooring tile is natural blue agate rough stone, which is made through precision cutting and processing, showing unique texture and charming color.

## **Blue agate floor tile characteristics**

### **Light transmittance:**

Blue agate tiles have excellent light transmittance and can show a soft halo effect under the illumination of light, creating a luxurious and romantic atmosphere.

### **Durability:**

The high hardness and wear resistance of natural agate make it suitable for long-term use. At the same time, the surface has been specially treated to be highly stain-resistant and easy to clean.

### **Unique texture:**

Each blue agate tile has a natural and unique texture, giving the space a personalized decorative effect.

Environmental protection: Using natural raw materials, it is non-toxic and harmless, and meets environmental protection standards.

## **Application scenarios of blue agate flooring tile**

### **Residential space:**

Suitable for living rooms and bedroom floors of high-end residences, especially areas where art and taste need to be emphasized.

### **Commercial places:**

widely used in luxury hotel lobbies, brand stores and high-end restaurants to enhance the overall grade and visual impact.

**Special space:** Used in bars, clubs, showrooms and other places, it can be used with lighting systems to create an attractive artistic atmosphere.

**Creative decoration:** In addition to floors, it can also be used in background walls, desktops and other decorative scenes to show more design possibilities.

Translucent blue agate floor tile is not only a building material, but also an artistic choice to enhance the style of space, suitable for user groups who pursue high-quality life and unique design.
