

The [black agate](#) translucent bar is a modern bar that combines luxury and functionality. It is a combination of [natural semi-precious stones](#) and translucent technology. It is not only the visual focus of the space, but also can create an immersive atmosphere through the intelligent lighting system. It is suitable for high-end residences, hotels, clubs and other scenes.

Applicable scenarios

Luxury villa: As the core of the open kitchen or private lounge, it is matched with metal/glass materials to highlight the modern light luxury style.

High-end hotels/clubs: attract customers to check in and spread the word, and increase the space premium

Commercial exhibition hall: Strengthen the brand's high-end image through the technological sense of translucent stone.

FAQ

Q1: Is the black agate translucent bar counter easy to clean?

A: The surface is highly polished, resistant to penetration and scratching, and can be maintained by daily wiping with a soft cloth.

Q2: Does it support personalized customization?

A: Yes! The size, curvature and light-transmitting area can all be customized.

Q3: How long does the installation cycle take?

A: Depending on the complexity, it usually takes 15-30 days to complete production.
