

The translucent [rose quartz](#) dining table is made of high-quality natural rose quartz stones and is handmade. The overall color is soft and warm, and the crystal structure is transparent and delicate. When the light is transparent, it is like the morning light, and the flow of light and shadow gives the space a warm and dreamy atmosphere. Under the light, the dining table is like a breathing crystal, quiet but full of soul.

Whether placed in a high-end private residence, an art restaurant, or a brand club, the rose quartz dining table can become the visual focus of the space, injecting a soft luxury and unique energy into the environment.

Rose quartz represents love and beauty. Sit here with your family and friends, and spend every memorable moment with the warmth of light and stone.
