

## Whale-tailed Red Flame Ruby Console Table

The design inspiration for the Whale Tail Console Table comes from the tail of a whale. Its form mimics the elegant curves of a whale's tail, presenting a naturally flowing beauty. The sides of the tabletop gently curve upwards, resembling the light, graceful movement of a whale's tail in the water. This not only symbolizes strength and elegance but also reflects the harmony and balance found in nature.

Standing quietly by the seaside, I watched a magnificent whale gracefully gliding through the water, occasionally breaching the surface and elegantly swaying its majestic tail. At that moment, I was deeply moved by this natural wonder. The whale's strength and grace, combined with the ocean's depth and vastness, silently spoke of nature's beauty and mystery. This scene planted a seed of inspiration in my heart. I wanted to transform this profound feeling into a unique home decor piece, capturing the whale's graceful curves and fluidity while conveying its symbolic strength and elegance. Thus, I chose lapis lazuli as the primary material, renowned for its deep blue color with gold and white veins, symbolizing spiritual power, truth and friendship, tranquility, and healing. Ruby, with its deep red and translucent luster, gives the entrance a deeper spiritual meaning. Known as the "King of Gems", it symbolizes passion, courage and eternal love.
