

White Crystal With Gold Foil | Golden Cicada [Console Table](#)

Symbolizing metamorphosis and rebirth, the Cicada Coat is inspired by the cicada's shell and lightweight texture. Adopting a streamlined design, the overall silhouette mimics the natural form of a cicada's molt, displaying a sense of movement and softness. The skeletonized metal mesh structure is visually light and agile, giving a sense of perspective.

On a hot summer afternoon, I walked on a path in the dense forest, my ears filled with cicadas, the sun through the leaves of the gap, sprinkled mottled light and shadow, my eyes inadvertently was attracted by a cicada is shedding its shell. Its light and transparent cicada, swaying gently in the breeze, seems to be the most delicate art in nature.

At that moment, I seemed to be touched by some mysterious power, the transformation and rebirth of cicadas, that light and tough texture, is not what we are pursuing in life? So, a design inspiration quietly sprout in my heart - I want to integrate this cicada image into the home design, to create a both artistic and full of vitality of the entrance space.
