Citrine has a hardness of seven. Citrine is called crystal topaz in the gem world. Its color ranges from light yellow,yellow, orange, olive to golden.Because the brightness and chroma are very good, as long as it is transparent and smooth, it is called the top grade,and it is far more transparent than topaz, so it is favored by consumers and is often cut into pendants or ring faces.Since natural citrine is extremely rare, the price is relatively expensive.

Backlit citrine yellow [Crystal Slab](#) is made of natural agate slices, and the surface adopts high-strength polishing technology, which is smooth and delicate. Since each piece of raw material is natural, the entire gemstone slab is unique. The unique texture has been favored by many designers, and it is a unique artwork.
