Silver stone in Xinjiang and Gansu, Shaanxi and other places are more generally by different layers of stone through crustal changes and high temperature and high pressure and other factors squeezed together, after wind erosion, water, stone body collision, the formation of a layer of a layer similar to the zebra on the vertical stripes of stone. Stones are generally hard and dense. Silver stone, the general stone is hard, but also part of the sandy rock product, the volume is not too large, 3CM in diameter to a few meters. Opaque

The Silver Stone Gemstone Slab has clear texture and is deeply embedded in fashion. It uses concise fold lines to create a concise and powerful vision, which brings us positive energy and gorgeous respect. Simple lines, atmospheric coordination, exquisite and texture, geometric lines frame a square outline, no complicated splicing technology, express the beauty of simplicity vividly, and give people an atmospheric style, simple but not monotonous, pure but not simple .

We have the flexibility to handle [semi-precious stones slab](#). Increase the use of semi precious stones by laminated other materials, For example, glass, aluminum honeycomb, granite, artificial stone, ceramic tile and other materials. Shengyao Gemstone is a leading manufacturer and supplier of the semi precious stone slab in China
